## **REQUIRED CERTIFICATIONS**

- 1) **Electrical** – Please refer to the list of Approved Electrical Underwriters on the application. These Electrical Underwriters are approved and certified by the State.
- 2) **Heater** – A licensed contractor of your choice may conduct the inspection. The certification must state that the heating system has been inspected and is in good working condition. The certification must also state the type of heating system – Gas, Electric, etc. For heating systems that have a flue/vent will also require a **NFPA 211 LEVEL II** inspection.
- 3) **Chimney/Fireplace - NFPA 211 Level II** Inspection by a duly licensed chimney sweep company of your choosing. Level II inspection must be noted on certification that it was conducted.
  - **NFPA 211 Level II inspection requires inspection of the chimney and of the interior surfaces of the flue. This is typically done with closed-circuit video equipment.**

All required certifications **MUST** be submitted with a completed application and payment (Cash, Check or Money Order). No credit card or electronic payments. The application will not be accepted if certifications are unsatisfactory or missing.

Complete all required information on the application. Please be sure to include settlement date and the email address of responsible party to receive the occupancy certificate.

**\*Required to be submitted (1) month prior to the settlement date for processing\***

Certifications can be obtained within one (1) year of the settlement date – **NO EXCEPTIONS**. However, we require submission to be 30 days prior to allow time for processing.

Process of the Residential Resales Use & Occupancy requires a search of the property history for any open permits, complaints and/or liens. Any unresolved matters will delay the issuance of the occupancy certificate. It is the Seller's responsibility to satisfy any matters on their property before settlement of property to Buyer.
